Dear NARST Members,

March for Science is an international event that will take place on April 22, 2017 (Earth Day). On April 10, 2017 the NARST Board approved an MOU to join March for Science as an official partner.

A total of more than a hundred organizations have already joined this partnership and given their support to the core principles of March for Science. The core principles of March for Science are focused on:

1. Science that serves the common good
2. Evidence-based policy and regulations in the public interest
3. Cutting-edge science education
4. Diversity and Inclusion in STEM
5. Open, honest science and inclusive public outreach
6. Funding for scientific research and its applications

The National Association for Research in Science Teaching (NARST) is a worldwide organization of professionals committed to the improvement of science teaching and learning through research. We believe that science education can improve the lives of people around the world. By joining March for Science as an official partner, NARST reaffirms its mission and goals in supporting evidence-based research on science teaching and learning all over the world. We promote diversity and inclusion in science to build healthy, safe communities for the benefit of all people.

All the best,

NARST Board of Directors (2016-2017)

10 April 2017
