## The Educational Leader's Guide to Improvement Science

*Data, Design and Cases for Reflection*

Edited by Robert Crow,  
Brandi Nicole Hinnant-Crawford,  
and Dean T. Spaulding

*The Educational Leader's Guide to Improvement Science* is a collection illustrating applied organizational problem-solving using methods of improvement science in educational leadership. This text concentrates on the elements faculty, students, and administrators need, and specific models where improvement science frameworks enhance the reliability and validity of improvement or quality enhancement efforts.

# GENERAL INFORMATION

## Information about NARST

**The National Association for Research in Science Teaching (NARST)** was founded in 1928 for the purpose of promoting research in science education at all educational levels and disseminating the findings of this research in such ways as to improve science teaching and learning.

The Association is incorporated as a non-profit corporation in the State of Minnesota. The official publication is the *Journal of Research in Science Teaching (JRST)*. NARST encourages presentations of a wide variety of investigations in all aspects of science education, including action, historical, philosophical, ethnographic, experimental, and evaluative research studies. Reports of empirical research, critical reviews, and theoretical works are encouraged. In October 2010, to reflect the Association's growing international focus and membership, the Board approved referring to the Association by its acronym only. At the April 2011 Board Meeting, the tagline for the Association was approved by the Board. Thus, the Association's name and tagline is:

*NARST—A worldwide organization for improving science teaching and learning through research.*

Research areas of interest to NARST members include curriculum development and organization, assessment and evaluation, learning theory, teacher education, programs for exceptional students (special needs and talents), equity studies, policy, and methods of teaching.

## NARST Mission Statement

NARST is a worldwide organization of professionals committed to the improvement of science teaching and learning through research. Since its inception in 1928, NARST has promoted research in science education and the communication of knowledge generated by the research.

The ultimate goal of NARST is to help all learners achieve science literacy. NARST promotes this goal by:

- 1) encouraging and supporting the application of diverse research methods and theoretical perspectives from multiple disciplines to the investigation of teaching and learning in science;
- 2) communicating science education research findings to researchers, practitioners, and policy makers; and
- 3) cooperating with other educational and scientific societies to influence educational policies.

To learn more about NARST you may visit the Association's website at <http://narst.org/>.

## Member Benefits

- » Ten issues of the *Journal of Research in Science Teaching (JRST)* are published each volume year. *JRST* has been ranked as one of the highest quality educational journals according to studies published by War, Holland and Schramm (*American Educational Research Journal*) and Guba and Clark (Educational Researcher) for the American Educational Research Association (AERA). These authors identified *JRST* as clearly the top research journal in science education.

# GENERAL INFORMATION

## NARST Code of Ethical Conduct

(Revised: 20 September 2018)

**The purpose of the National Association of Research in Science Teaching (NARST) Code of Ethical Conduct** is to articulate a set of aspirational principles to guide and support members as they engage in professional activities—research, teaching, and service. NARST members are science education professionals who include researchers, practitioners, and graduate students from various cultures worldwide. These aspirational principles align with and support the mission of the organization to help all members achieve, develop, and contribute meaningfully to the improvement of science teaching and learning through research. NARST expects its members to adhere to the highest ethical standards. The Code of Ethical Conduct serves as a guide to the everyday professional conduct of science educators. Unfamiliarity with NARST's Code of Ethical Conduct is not a valid defense for engaging in or failing to challenge observed unethical behavior. We accomplish this through our Code of Ethical Conduct where there is:

### A. Professional Competence

Science education professionals strive to maintain the highest levels of competence in their work; they recognize the limitations of their expertise; and they undertake only those tasks for which they are qualified by education, training, or experience. They recognize the need for ongoing education in order to remain professionally competent; and they utilize the appropriate scientific, scholarly, professional, technical, and administrative resources needed to ensure honesty and integrity. Science education professionals conduct research, teach, practice, and provide service only within the boundaries of their competence, based on their education, training, supervised experience, or appropriate professional experience. They consult with other professionals when necessary for the benefit of their students, research participants, and clients. They maintain awareness of current scientific, scholarly, and professional information in their fields of activity and undertake continuing efforts to maintain competence in the skills they use. Importantly, professional

competence must also include a willingness to accept and integrate new information and experiences, regardless of the effect that process has on research outcomes.

### B. Integrity

It is the social responsibility of science education professionals to maintain integrity in all conduct, publications, and forums, and give due credit to the contributions of others. Adhering to this standard means science education professionals do not fabricate, falsify, or plagiarize. Public comments on matters of importance that are relevant to science education must be made with care and accuracy. Adhering to this standard means science education professionals do not use deficit language, deceptive statements concerning research data, or otherwise knowingly make false, misleading or deceptive statements in practicing and presenting research. Comment and debate within the bounds of collegiality and professionalism that keep the organization moving forward and current with emergent issues and perspectives are encouraged. Adhering to this standard means science education professionals do not use dismissive remarks or gestures, restrict multiple voices, or use derogatory language. In short, science education professionals conduct their professional activities in ways that engender trust and confidence.

### C. Professional and Scholarly Responsibility in Science Teaching, Learning, and Research

Science education professionals have a responsibility to use research practice and policy to advance NARST members' understanding of the teaching and learning of science in all learning contexts—formal, informal, local, and global—through research, practice, and policy. They adhere to the highest scholarly and professional standards within their field of expertise and accept responsibility for adherence to those standards. Science education professionals should regard the tutelage of graduate students and early career faculty as a trust conferred by the organization for which they work, as well as NARST, for the promotion of these individuals' learning and professional development.

# GENERAL INFORMATION

Science education professionals understand that they form a community and show respect for other science education professionals even when they disagree on theoretical, methodological, or personal approaches to professional activities. In activities involving marginalized populations, it is essential that responsible science education professionals seek out the voices and experiences of members of these groups and treat them as critical to their scholarship. While always endeavoring to be collegial, science education professionals must never let the desire to be collegial outweigh their shared responsibility for ethical behavior. When appropriate, they consult with colleagues, NARST's Equity and Ethics Committee, or organizational entities such as their institutional review board in order to prevent, avoid, or challenge unethical conduct.

## **D. Respect for People's Rights, Dignity, and Diversity**

Science education professionals respect the rights, dignity, and worth of all people in their professional activities. They treat other professionals, students, research participants, and members of the organization fairly, respectfully, and without exploitation or harassment. Science education professionals acknowledge the rights of others to hold values, attitudes, and opinions that differ from their own and take reasonable steps to avoid harm to others in the conduct of their work. They learn with others, share ideas honestly, give credit for others' contributions, and encourage others to contribute their unique skills, knowledge, and interests in professional environments. Science education professionals are sensitive to cultural, individual, and role differences in teaching, studying, and providing service to groups of people with distinctive characteristics, as well as the power differential that might result from such differences. Science education professionals carefully avoid discrimination and bias toward individuals and groups based on race, gender, age, religion, ethnicity, nationality, sexual orientation, gender expression, gender identity, presence of

disabilities, educational background, socioeconomic status, or other personal attributes. They refrain from making biased assumptions about others and perpetuating demeaning attitudes and stereotypes. Science education professionals do not accept any forms of discrimination and actively challenge implicit and explicit forms of discrimination.

## **E. Social responsibility**

Science education professionals are aware of their scientific and professional responsibility to the communities and societies in which they live. This awareness extends to their involvement and service to an increasingly diverse and international NARST community. NARST members are guided by the values and standards that reflect the professional literature. They strive to promote equity and the public good by advancing scientific and scholarly knowledge. Science education professionals are aware of the differences in society and culture that impact scholarly knowledge and academic work. They value and embrace the public trust in research and teaching and are concerned about their ethical behavior and the behavior of other science education professionals that might compromise that trust. Science education professionals should reasonably expect of themselves and others to be guided by a code of ethics that supports efforts to resolve ethical dilemmas.

# GENERAL INFORMATION

## Explanation of Program Session Formats

### Paper Sessions Organized by the Program Committee

In a paper session, the presider introduces the presenters and monitors the time used for each presentation. All papers will be allotted 15 minutes for presentation, followed by approximately 5 minutes of questions or discussion. The presider and audience will use any time remaining in the session for additional discussion, general review, and suggestions for further research. Each presenter is expected to have a manuscript for distribution to attendees. The manuscript may be available either via hard copy distribution at the session or via electronic access provided by the author.

### Symposium

A symposium involves a panel of experts or stakeholders who examine a specific theme or issue. This format does not involve the presentation of individual papers. Therefore, individual papers and authors will not be listed under this format. Rather, the participants are listed as panel members. The proposer controls presentations, discussion, and questioning with the assistance of the presider or discussant (if designated). Discussion should promote the expression of similar or alternative viewpoints and theoretical positions. The proposer of the symposium is expected to disseminate a paper or a summary with references either via hard copy distribution at the session or via electronic access provided by the proposer.

### Related Paper Set

This category accommodates, in a single session, three to five related research papers reporting several studies that originate from a common base of research. This format also allows for common elements of design or approach to be presented once rather than repetitively. The proposer and authors may determine the specifics of the session once it is accepted. For instance, those involved may opt for a formal presentation style or they may conduct their session in a more informal, discussion-oriented style. Each presenter is expected to have a manuscript for distribution to attendees. The manuscript may be available either via hard copy distribution at the session or via electronic access provided by the author.

### Poster Session

This format offers presenters the opportunity to display their work graphically on a poster display board. The poster display is 4 ft. wide x 8 ft. long (48 inches x 96 inches) – horizontal orientation.

*PLEASE NOTE:* We are no longer using the tri-fold boards. Each presenter must set up their poster display prior to the start of the Poster Session and then remove it at the end of the Poster Session. Each presenter is expected to have a manuscript for distribution to attendees. The manuscript may be available either via hard copy distribution at the session or via electronic access provided by the author.

### Roundtable Session

Roundtable sessions allow maximum interaction among presenters and attendees. Papers accepted for a roundtable session will be grouped into tables with three papers per table, clustered around shared interests. Each roundtable session will be scheduled for a 60-minute time slot, with each presenter presenting for 12-15 min and the rest dedicated for discussion. We ask that the presenters at each table share the time equally. Presenters wishing to display information may do so from their own laptop computer screens. If you plan to use a laptop, please be sure the battery is charged, as a power source will not be provided. Alternatively, presenters can share printed materials.

## Guidelines for Meeting Presenters

- Go to the designated room at least 10 minutes early.
- Greet the presider/discussant.
- NARST provides the LCD and screen in each presentation room. NARST does not provide computers, speakers, microphones, pointers, or other audio/visual equipment. You must have your own computer or you may put your file on a USB flash drive in advance, in case you will be using another presenter's computer for your presentation.
- Check your understanding of the LCD projector and any other audio/visual equipment prior to the session.

# GENERAL INFORMATION

- Keep presentation within the designated time limit.
- Invite audience comments and questions.
- If there is no presider assigned for your session, then presenters should keep time for each other.

## Guidelines for Presiders and Discussants

We have accommodated most sessions with a presider, whose role is detailed below. For sessions without presiders, we are counting on the presenters to set aside time for discussion so that the audience participants can contribute to a discussion of the papers.

The role of the Presider includes:

- Arrive early at designated room and arrange furniture as per desires of presenters.
- Check and focus LCD projector.
- Check pronunciations of the names of the presenter and their institutions.
- With presenters, make a time plan, retaining the order of presenters in the program.
- Start session promptly.
- Introduce presenters and serve as time-keeper. Alert presenters when they have 5-, 3-, and 1-minute remaining. It is important to end each presentation within the agreed allocated time to ensure fairness to all presenters and in order to end the session on time. One suggestion that may be followed is if someone begins to exceed their allotted time, then it is appropriate to stand up and politely announce to the audience that you invite further discussion directly with the author(s) at the conclusion of the entire session.
- Facilitate discussion, assuring equitable involvement of audience members. Close session on time.

The role of the Discussant includes:

- Read papers before the session and have remarks prepared ahead of time.
- Perform presider duties as detailed above, if there is only a discussant for the session.

- After the presentation, make brief and cogent remarks on each paper with suggestions for future research.

# GENERAL INFORMATION

## 2021 NARST Annual International Conference

The Program Chair invites NARST members and others to participate in the **2021 NARST Annual International Conference** and contribute to the 2021 conference by submitting program proposals.

**Venue:** Hilton Orlando Hotel, Orlando, FL

**Dates:** April 7-10, 2021

**Theme:** Science Education, a Public Good for the Good of the Public? Research to Empower, Evoke, and Revolutionize

**Science Education, a public good for the good of the public? Research to empower, evoke, and revolutionize** is a fitting call for this era of drastic change (e.g., population shifts, prominence of technology, disappearing economies) and daunting challenges (e.g., increased frequency of life-impacting natural and human-inspired disasters). It is a charge to conduct science education research for a socially just world.

A critical look at outcomes reveals a socially unjust world resistant to transformation. Throughout time, science education has been a public good of great value, but only and fully accessible to those society regarded as worthy. For example, in some countries, agencies identified individuals early in their development and tracked them into educational experiences for a life in the sciences with all its privileges (e.g. esteemed status, monetary benefits). In the United States (U.S.), science education for much of its existence was overtly reserved for whites, especially those of economic means. It was a vehicle to develop intellectual disciplines to solve real-world problems, competencies to ensure privileged positions in society for its participants. A version less valued by society, designed to hone vocational skills and socialize for subservient roles, was later expanded to include the poor and provided in scarcely resourced segregated settings for those classified as non-white.

Fast forward to the present: the intent of past practices to exclude is not overt in some countries, including the U.S., but parity in group outcomes has been slow and the historical structures (e.g., financing of education, allocation of resources, segregation and tracking of students) that contribute to outcome disparities remain largely intact.

For instance, whites exceed their representation in the U.S. general population in science education of high currency (e.g., AP courses, science majors) and in heavily resourced settings where high-quality science education is provided from preschool to postsecondary. When viewed from a systems and group perspective, who gets access to which opportunities has remained mostly unaltered across time.

Substantial progress towards a socially just world in which science education is a public good for the good of the public—a public inclusive of all desiring to partake—is elusive. A call for research to empower, evoke, and revolutionize may be heretical to those who believe western science, one foundation of science education, is a universal, objective body of knowledge immune to the frailties of humans who construct it and the sociopolitical contexts in which it is constructed. It may be unsettling for others who see science education strictly through an individual rather than group and complex systems lens and it may be disconcerting to those who adhere to presentism, an ahistorical view that exclusively attributes current conditions to the here and now. Receptive or not, the drastic changes and daunting challenges at this time demand all hands on deck and warrant an equity- and equality-oriented criticality—an intentional, exacting examination to deconstruct and disrupt the status quo privileging a few in pursuit of a socially just world for the many. The time for research to empower (envision beyond the existing boundaries), evoke (think and act boldly in times of ease and turmoil), and revolutionize (abandon the idea good intentions are enough and institute change to achieve equitable and equal outcomes) is now. It is this kind of research the 2021 conference aims to inspire.

### Submission Deadline:

The Program Chair or designate must receive your program proposals for the 2021 Annual International Conference by August 15, 2020. This deadline allows sufficient time for processing, reviewing, and evaluating the many submitted proposals in a fair manner. By early July 2020, the call for program proposals will appear on the NARST website.

## NARST Sponsored Sessions at NSTA Conferences 2020

---

### THURSDAY, APRIL 2

#### NARST-SPONSORED SESSION:

##### **Latent Expectancy-Value-Cost Motivation Study of Black/African American Grade 5 Students**

**8:00 AM – 9:00 AM**

**Room:** Flagship A, Seaport Hotel

Discussion centers on what affects student motivation (and a survey to help determine this). Review a study of expectancy-value-cost motivation categories of 860 Black/African American fifth grade students in an urban school district.

**Speaker:** David McKinney

Issac Newton Middle School

**Session Topic:** General Science Education

**Session Type:** Presentation

#### NARST-SPONSORED SESSION:

##### **Students as Curriculum Critics, Reframing Issues of Motivation**

**12:30 PM – 1:30 PM**

**Room:** Flagship A, Seaport Hotel

Both teachers and researchers identify low motivation among students as a problem that prevents meaningful science learning. Emphasis will be placed on learning to look at and make sense of students' willingness to engage.

**Speaker:** Daniel Morales-Doyle

Assistant Professor

The University of Illinois at Chicago

**Session Topic:** General Science Education

**Session Type:** Hands-On Workshop

#### NARST-SPONSORED SESSION:

##### **An Equity Lens on NGSS-Focused Classroom-Embedded Assessments**

**2:00 PM – 3:00 PM**

**Room:** Flagship A, Seaport Hotel

This study examined the extent to which culturally relevant science teaching strategies were taken up by middle school science teachers as a result of a two-year professional development explicitly focused on meeting the NGSS.

**Speakers:** Sheron Mark

University of Louisville

Thomas Tretter

Professor of Science Education

University of Louisville

### FRIDAY, APRIL 3

#### NARST-SPONSORED SESSION:

##### **Exploring the Potential of Teacher Leadership to Drive STEM Programming in Public Schools**

**9:30 AM – 10:30 AM**

**Room:** Flagship A, Seaport Hotel

Discuss findings from a research project on the development of STEM programming in schools. Recommendations are provided for approaches to developing STEM programming through teacher leadership initiatives.

**Speakers:** Gillian Roehrig

Professor

STEM Education Center

Elizabeth Crotty

STEM Education Center

**Session Topic:** General Science Education

### NARST-SPONSORED SESSION:

#### **Science Across the Spectrum—Including Students with Autism and Intellectual/Developmental Disabilities**

**12:30 PM – 1:30 PM**

**Room:** Flagship A, Seaport Hotel

Using an original research study, strategies will be shared that guide participants on any modifications that may be needed based on their individual classroom and teaching needs. As the interventions presented will be specific to students with ASD and IDD, few modifications or accommodations should be needed.

**Speakers: Jiwon Hwang**

California State University

### NARST-SPONSORED SESSION:

#### **Teaching STEM Through an Interdisciplinary Approach: An Example of Water Quality and Physical Mix Separation Methods**

**2:00 PM – 3:00 PM**

**Room:** Flagship A, Seaport Hotel

Take part in the development of the water quality research activity, enabling you to understand how to connect official curriculum standards with a teaching approach that is highly relevant to science education. Discover how to use a research-based teaching model in an eminently practical and interactive way.

**Speakers: Norman Lederman**

Professor  
Illinois Institute of Technology

**Radu Bogdan Toma**

**Session Topic:** Physical Science

### NARST-SPONSORED SESSION:

#### **Clarifying the Role(s) of the Crosscutting Concepts in Science and Engineering Learning**

**8:00 AM – 9:00 AM**

**Room:** Flagship A, Seaport Hotel

Review outcomes of a 2.5-day NSF-funded workshop held in December 2018 focused on clarifying the roles the crosscutting concepts play in supporting science learning. We will share potential theories-of-action describing how CCCs support science learning and priorities for future research.

**Speakers: Jeff Nordine**

Deputy Head of Department  
Physics Education  
Leibniz Institute for Science  
and Mathematics Education

**Sarah Fick**

Research Assistant Professor  
of Science Education  
University of Virginia

**Session Topic:** Engineering-Technology-and

**Room:** Flagship A, Seaport Hotel

The practice of creating and using models is arguably the central activity of science, but teachers tell us it can be among the most challenging to implement in the classroom. Find out how to use “energy cubes” to track the flow of energy—an abstract and invisible quantity—in a simpler model system.

## NARST Award Recipients

### Distinguished Contributions to Science Education through Research Award

This award is presented at the Annual International Conference but is bestowed only when an outstanding candidate, or candidates, has been identified. It is given to recognize individuals who, through research over an extended period of time, have made outstanding and continuing contributions, provided notable leadership, and made a substantial impact in the area of science education.

Speaker:

**Dr. Yossi Leshem**  
Tel Aviv UniversityYossi Leshem is a Professor  
Emeritus in the School of  
Zoology, Faculty of Life Sciences  
at Tel Aviv University, and  
founder of the International  
Center for the Study of BirdMigration. In 1971, he began his career at the Society  
for the Protection of Nature in Israel and was CEO  
(1991-1995) and chair of its public council.Prof. Leshem has been researching bird migra-  
tion and raptor breeding ecology for 5 decades. His  
doctoral research at Tel Aviv University, conducted  
in cooperation with the Israel Air Force, reduced air-  
craft-bird collisions by 76%, thus saving the national  
budget \$1.5 billion. Yossi developed an educational  
online science program ([www.birds.org.il](http://www.birds.org.il)) that is  
currently taught at approximately 450 schools. He  
spearheaded the national effort to use barn owls as  
biological pest control agents in agriculture, signifi-  
cantly reducing the use of pesticides, and led an  
extensive research project in cooperation with the

Max Planck Institute at Radolfzell to track migrating storks, using satellite transmitters. To this project joined the Ministry of Education in Israel, who financed the program to promote STEM learning by tracking the Migrating Storks on-line.

Since 2002, Prof. Leshem has initiated a host of successful joint projects with the Jordanians and Palestinians using Barn Owls as biological pest control agents in agriculture, combining education, research, and nature conservation. The project became a national and regional project with 4,500 nesting boxes dramatically reducing the use of pesticides in the region. Currently, Prof. Leshem leads a trilateral project with Cyprus, Greece and Israel on the subject. In parallel, he works with the Chief of General Staff's office to implement the "Nature Defense Forces – Commanders Take Responsibility for their Environment" project. This initiative consists of 60 projects with an educational emphasis.

Prof. Leshem received Lifetime Achievement Award for Environmental Protection, from the Minister for Environmental Protection (2008); Bruno H. Schubert Foundation Award for World Nature Conservation (2012); Lifetime Achievement Award of The Israel Society of Ecology and Environmental Sciences (2017); Honorary Fellowship of the Technion Board of Governors (2017); Honorary Membership, Israel Zoological Society (2018), The award of "Significant Contribution to Israel Aviation", from the Israeli Airline Pilots Association (2019) and an appreciation medal from the the Israeli Air Force commander.

Prof. Leshem is the author of 11 books, many scientific articles, and hundreds of popular articles. He is father to five, and grandfather to eight.

### ***Migrating Birds Know No Boundaries: The Scientific and Educational Dimension***

During thousands of years of history, the Middle East, located at the junction of three continents – Europe, Asia and Africa – has been a focus for tension, conflicts and wars which continue to these days. On the other hand, the Middle East comprises a bottleneck of international importance for bird migration, one of the most important worldwide. Over 500 million birds migrate over the region twice a year. The diversity of species is also exceptional, 540 species of birds can be observed in Israel.

In my talk, I will present a unique effort to use the outstanding phenomenon of bird migration for science and peace education. The educational and conservation programs are designed for formal school systems, informal settings and the

broad public and the Israel Defense Forces. The programs are based on research in several fields in the past five decades. The birds and migration constitute a platform for learning on the unique nature phenomenon, developing inquiry-learning and developing interest in the subject that combines activities in the class, and in the field. Birds and their migration were used for joint learning between Israelis, Jordanians and Palestinians, known more about the geopolitical conflict. The emphasis is that birds and nature are a connecting tool between people and religions regardless of politics and boundaries.

Based on the joint research of Tel-Aviv University and Max Planck Institute in Radolfzell, Germany, funded by the German Ministry of the Environment, satellite transmitters were attached to 120 German Storks and students from Israel, Jordan and the Palestinian Authority followed the migration using a website ([www.birds.org.il](http://www.birds.org.il)), whilst also understanding key questions like the effect of the weather. In addition the students could track the data of the joint research with the Israeli Air Force, which suffered many collisions from migrating birds, and is based on the data that was gathered from a ground-network of bird-watchers, radars, a motorized-glider and UAV's. A joint research and activity was developed in cooperation with farmers in Jordan, Palestine Authority, Cyprus and Greece, in which Barn Owls are used as biological pest-control agents in order to significantly reduce the use of pesticides. An educational program was developed in which students could follow data from 5,000 nesting boxes in the Middle East and track the cameras in the nesting boxes, whilst also taking part field-trips in the areas of the nesting boxes.

Other initiatives I'll describe encourage the Israeli Defense Forces to integrate nature conservation education.

Currently, 550 schools from all Israeli sectors (Jewish, Arab and Druse) teach about birds and their uniqueness in the Middle East.

Funded by the government, a network of seven birding centers were established that constitutes an educational hubs and research and nature protection centers for students and the public, led by the Society for the Protection of Nature in Israel (NGO).

**STRAND 1:**  
**Science Learning: Development of Student Understanding**

*Supporting Understanding with Mathematics and Computational Thinking*

**8:30 AM – 10:00 AM**  
**Columbia**

Presider:  
**Kathryn Green**, University of Georgia

**Effective Algebraic Problem-Solving in Physics Through Activation of Prior-Mathematical Knowledge**

**Süleyman Tursucu**, Radboud University Nijmegen

**Erik Barendsen**, Radboud University & Open University

***Intertwining Three Dimensions: Levels of Performance for Computational Thinking While Using Models of Hydrologic Systems***

**Kristin L. Gunckel**

**Daniel L. Moreno**, University of Arizona

**Beth A. Covitt**, University of Montana, SpectrUM Discovery Area

**Bess Caplan**, Cary Institute of Ecosystem Studies

**Judith A. Cooper-Wagoner**, University of Arizona

**John C. Moore**, Colorado State University

**Alan R. Berkowitz**, Cary Institute of Ecosystem Studies

***Multiple Representations in Computational Thinking: A Study of Second Grade Students***

**Kristina M. Tank**, Iowa State University

**Tamara J. Moore**, Purdue University

***Seeing the Forest through the Trees using Network Analysis: Exploring Student Responses to Physics Problems***

**Mihwa Park**, Texas Tech University

**STRAND 2:  
Science Learning: Contexts,  
Characteristics and Interactions  
Modeling and Model-Based Teaching**

**8:30 AM – 10:00 AM**

**Hawthorne/Belmont/Laurelhurst**

Presider:

**Ryan Coker**, Florida State University

***Modes and Transfer of Authority: Cultural Historical Activity Theory Analysis of Modeling Activities***

**Hyun-Jung Cha**, Seoul National University

**YoonJoo Shin**, Seoul National University

**Chan-Jong Kim**, Seoul National University

***Model-Based Science Teaching: Effects on Confidence, Interest, and Attitudes of Female High School Students***

**Grant Williams**, St. Thomas University

**John J. Clement**, University of Massachusetts

**Duy Pham**, University of Massachusetts Amherst

***Using the Preschool Scientific and Engineering Practices (PreSEP) Instrument to Explore Preschoolers' Engagement with Elements of Modeling Practice***

**Alison R. Miller**, Bowdoin College

**STRAND 3:  
Science Teaching—Primary School  
(Grades PreK-6): Characteristics  
and Strategies**

***Analyses of Elementary Pre-service and Inservice Teachers' Use of Crosscutting Concepts in Plans and Enactments***

**8:30 AM – 10:00 AM**

**Meadow Lark/Douglas Fir – 3rd Floor**

Discussant:

**Deborah Hanuscin**, Western Washington University

***Elementary Pre-service Teachers' Use of the CCCs in Lesson Plans in Two Practice-Based Science Methods Courses***

**Carrie-Anne Sherwood**, Southern Connecticut State University

**Amanda Benedict-Chambers**, Missouri State University

**Deborah L. Hanuscin**, Western Washington University

***Investigating Elementary Pre-service Teachers' Implicit use of CCC's Overtime through Lesson Planning***

Tina Vo, University of Nevada, Las Vegas  
Nicole Thomas, University of Nevada, Las Vegas

***Inservice Teachers' Use of Crosscutting Concepts in Planning for 3D Elementary Learning***

Anna Maria Arias, Kennesaw State University  
Brendan E. Callahan, Kennesaw State University  
Michael Dias, Kennesaw State University  
Karen Kuhel, Kennesaw State University

***Reference to CCCs in Conversation Supporting an Integrated STEM Elementary Unit***

Sarah J. Fick, University of Virginia  
Jennifer Chiu, University of Virginia  
Kevin W. McElhaney, SRI International

**STRAND 4:  
Science Teaching—Middle and High School (Grades 5-12): Characteristics and Strategies**

***Secondary Science Teaching in the US: Current Status, Trends over Time, and Factors Affecting Instruction***

**8:30 AM – 10:00 AM  
Salon E**

***Secondary Science Teaching in the US: Current Status, Trends over Time, and Factors Affecting Instruction***

Eric R. Banilower, Horizon Research, Inc.  
Peggy J. Trygstad, Horizon Research, Inc.  
Laura M. Craven  
Patrick S. Smith, Horizon Research, Inc.

**STRAND 5:  
College Science Teaching and Learning (Grades 13-20)**

***Affordances for Students' Literacy and Engagement in Postsecondary Biology***

**8:30 AM – 10:00 AM  
Salon D**

Presider:  
Andy Cavagnetto, Washington State University

***Case Study Pedagogy and Learning Outcomes: A Framework for Teaching Biology with Narratives***

Ally Hunter, University of Massachusetts, Amherst  
Melissa Zwick, Stockton University

***Developing Learning Progression for Botanical Literacy and Measuring Learning Gains: Construct Modeling Approach***

Pongprapan Pongsophon, Kasetsart University, Bangkok, Thailand  
Artitaya Jituafoa, Suratthani Rajabhat University, Suratthani, Thailand

***Exploring Approaches to Engaging Undergraduates in Research: Differential Impacts on Students' Self-efficacy and Science Skills***

Kelly M. Schmid, Syracuse University  
Jason R. Wiles, Syracuse University

***Exploring Peer Learning Assistants' Impact on Student Performance and Perceptions in an Undergraduate Biology Course***

Brittney A Ferrari, University of Georgia  
Jonathan Dees, University of Georgia  
Norris Armstrong, University of Georgia  
Kristen Miller, University of Georgia  
Julie M. Kittleson, University of Georgia

## **STRAND 5: College Science Teaching and Learning (Grades 13-20)**

### ***Investigating Faculty Change***

**8:30 AM – 10:00 AM**

**Salon C**

Presider:

**Jana L. Bouwma-Gearhart**, Oregon  
State University

### ***A Close Look at Change: Understanding Factors that Shape Instructor Evolution during Instructional Reform Efforts***

**Katelyn Southard**, University of Arizona  
**Jonathan Cox**, University of Arizona

## Concurrent Session 6b Poster Session 4:45 PM – 5:45 PM

### STRAND 1: Science Learning: Development of Student Understanding

#### Strand 1 Poster Session

4:45 PM – 5:45 PM  
Exhibit Hall

P1:

*A Review of Empirical Literature: Cognitive Processes Framing Modeling Practices in Science Education*

Ayca K. Fackler, The University of Georgia

P2:

*Developing and Validating a Learning Progression for Computational Thinking in Earth and Environmental Systems*

Beth A. Covitt, University of Montana, SpectrUM Discovery Area

Kristin L. Gunckel, University of Arizona

John C. Moore, Colorado State University

Alan R. Berkowitz, Cary Institute of Ecosystem Studies

Bess Caplan, Cary Institute of Ecosystem Studies

Judith A. Cooper-Wagoner, University of Arizona

Michael Jahnke, University of Montana

Daniel L. Moreno, University of Arizona

P3:

*Investigating Groundwater: 7th-Grade Students' Mapping Models to Phenomena*

Holly White, University of Nebraska, Lincoln

Diane Lally, University of Nebraska, Lincoln

Cory T. Forbes, University of Nebraska, Lincoln

P4:

*Socio-Scientific Issues to Engage Students in Claims, Evidence and Reasoning*

Sissy S. Wong, University of Houston

Jie Zhang, University of Houston

Jennifer Donze, University of Houston

Jackie Relyea, North Carolina State University

Ma Glenda Wui, University of Houston

### STRAND 2: Science Learning: Contexts, Characteristics and Interactions

#### Strand 2 Poster Session

4:45 PM – 5:45 PM  
Exhibit Hall

P5:

*Applying Conjecture Mapping to Analyze Children's Use of Science Practices in Story-Driven Investigations*

Kyungjin Cho, Pennsylvania State University

Julia Plummer, Pennsylvania State University

P6:

*Youth Social Interactions in Informal Makerspaces: What are the Pedagogical Implications for Supporting Productive Collaborations?*

Ti'Era D. Worsley, University of North Carolina at Greensboro

Edna Tan, University of North Carolina at Greensboro

Sara Heredia, The University of North Carolina Greensboro

P7:

*Children Arguing in Science Lessons Over Time: The Discursive Construction of Evidence Use*

Luiz Gustavo Franco Silveira, Universidade Federal de Minas Gerais (Brazil)

Danusa Munford, Universidade Federal de Minas Gerais

P8:

***Design-Based Lessons Foster Equity When Integrating Engineering Into Biology Classrooms***

**Tory H. Williams**, University of Maryland, Baltimore County

**Christopher R. Rakes**, University of Maryland, Baltimore County

**Jonathan Singer**, University of Maryland, Baltimore County

**Jacqueline Krikorian**, University of Maryland, Baltimore County

**Julie Ross**, Virginia Tech

P9:

***What Does Engagement Look Like? Secondary Science Teachers' Reported Evidence of Student Engagement***

**Vance J. Kite**, North Carolina State University

**Michelle Nugent**, North Carolina State University

**Soonhye Park**, North Carolina State University

**Roger Azevedo**, University of Central Florida

**Min Chi**, North Carolina State University

**Michelle Taub**, University of Central Florida

P10:

***Examining the Integration of Science and Engineering: The Stickiness of Tinkering in an Elementary Classroom***

**Jennifer Schellinger**, Florida State University

**Lama Jaber**, Florida State University

**Sherry A. Southerland**, Florida State University

P11:

***Multifaceted Effects of Self-efficacy on Taiwanese High School Students' Learning Engagement***

**Tzung-Jin Lin**, National Taiwan Normal University

P12:

***Traces of Ambitious Science Teaching and Science and Engineering Practices in Teachers' Noticed Moments of Students' Thinking in a Science Classroom***

**Sahar Vali**, West Virginia University

**Melissa J. Luna**, West Virginia University

P13:

***Threshold Concepts in Novices' and Experts' Evolutionary Explanations***

**Daniela Fiedler**, IPN–Leibniz Institute for Science and Mathematics Education

**Gena C. Sbeglia**, Stony Brook University (SUNY)

**Ute Harms**, IPN – Leibniz Institute for Science and Mathematics Education

**Ross H. Nehm**, Stony Brook University (SUNY)

P14:

***Teaching and Learning in Makerspaces: Equipping Teachers to Become Equity Oriented Maker Educators***

**Sara C Heredia**, The University of North Carolina Greensboro

**Edna Tan**, University of North Carolina at Greensboro

P26:

**A Model to Assist in Combatting STEM Graduate Student Imposter Syndrome**

Julianne A. Wenner, Boise State University

Paul Simmonds, Boise State University

Megan Frary, Boise State University

Donna Llewellyn, Boise State University

P27:

**Characteristics of Effective Professional Development for Undergraduate Science Instructors: A Critical Review of the Literature**

Katherine McCance, North Carolina State University

Soonhye Park, North Carolina State University

P28:

**Chemistry Students' Understanding of Dissolving and Associated Phenomena: The Case of Sodium Chloride**

James M. Nyachwaya, North Dakota State University

Krystal Grieger, North Dakota State University

P29:

**College Students' Perceptions of STEM and Choices of Switching out of Initial STEM Majors**

Youngjin Song, California State University, Long Beach

Lisa M. Martin-Hansen, California State University, Long Beach

P30:

**Cultivating Water Literacy in Undergraduate STEM Education: Students' Socio-Scientific Reasoning about Socio-hydrologic Issues**

David C. Owens, Georgia Southern University

Destini N. Petitt, University of North Carolina-Charlotte

Diane Lally, University of Nebraska, Lincoln

Cory T. Forbes, University of Nebraska, Lincoln

### Salon E & F – Lower Level

Announcement of 2021 Venue & Passing of the Gavel

**Philip Bell**, University of Washington

Philip Bell is Professor and Chair of Learning Sciences & Human Development in the College of Education at the University of Washington where he holds the Shauna C. Larson Endowed Chair in Learning Sciences. His

current research focuses on understanding and resourcing equity improvements in PK-12 science education. He has worked with families and communities in their home settings and neighborhoods, in classrooms and informal education programs, and across districts and national networks with teachers and educational leaders. Since 2008 he has directed the UW Institute for Science & Math Education focused on promoting equity and justice in PK-12 STEM education through partnerships between the university, community organizations, and educational institutions. Bell edits a popular collection of professional learning resources called STEM Teaching Tools. He has a background in human cognition and development, science education, computer science, and electrical engineering.

### ***Making Science Education Matter in a Damaged and Unjust World***

Abstract: Whose interests are being served through contemporary efforts in science education? In what ways are researchers responsible for promoting equity and justice? Through this presentation I continue a conversation in our field about the multiple ways in which science education should engage in justice projects. I use this focus to explore how our work can promote a thriving world at a time of ecological crisis and social turmoil. By leveraging insights from a range of research and development efforts, I highlight how our field might go about infrastructuring

specific equity and justice projects. I argue for collectively deliberating on and enacting social imaginaries for science education that center diverse sense-making; coordinate science learning directly with civic, family, and community life; and work in solidarity with the interests of communities experiencing systemic oppression and marginalization. From this stance, I call upon our community to continue exploring how we might organize ourselves and our efforts to enact science-related justice projects within and across institutions and organizations to better support thriving and just futures.

**STRAND 1:**  
**Science Learning: Development of Student Understanding**

*Understanding of Climate and Natural Systems*

**8:30 AM – 10:00 AM**  
**Salmon**

Presider:

**Asli Sezen-Barrie**, University of Maine

*Assessment of Students' Explanatory Models for Conceptual and Epistemic Quality: The Case of Ocean Acidification (OA) and Its Impacts on Oysters*

**Asli Sezen-Barrie**, University of Maine  
**Mary K. Stapleton**, Towson University  
**Anica Miller-Rushing**, University of Maine

*Climate Education in Secondary Science: Comparison of Model-Based and Non-Model-Based Investigations of Global Climate Data*

**Devarati Bhattacharya**, University of Nebraska  
**Kimberly Carroll Steward**, University of Nebraska, Lincoln  
**Cory T. Forbes**, University of Nebraska, Lincoln  
**Mark Chandler**, Columbia University

*Making Community Experiences and Knowledge Visible in Modeling Local Climate Systems*

**Heather F. Clark**, University of California, Los Angeles  
**William A. Sandoval**, University of California, Los Angeles

*Preschool Children's Understandings of Food Webs Throughout a Summer Camp Experience*

**Lisa A. Borgerding**, Kent State University  
**Fatma Kaya**, Kent State University

*Students' Plausibility Shifts and Knowledge Gains When Evaluating Competing Explanatory Models about Freshwater Resource Availability*

**Timothy Klavon**, Temple University  
**Janelle M. Bailey**, Temple University  
**Doug Lombardi**, University of Maryland, College Park  
**Archana Dobaria**, Temple University

---

**STRAND 2:**  
**Science Learning: Contexts,  
Characteristics and Interactions**

*Motivating Youth Engagement*

**8:30 AM – 10:00 AM**

**Hawthorne/Belmont/Laurelhurst**

Presider:  
**Jonathan Shemwell**, University  
of Alabama

*Influences of Worldview and Knowledge  
on Climate Change Discourse: Evidence  
for Ideologically-Motivated Reasoning  
among Youth*

**Lynne Zummo**, Stanford University  
**Brian M. Donovan**, BSCS  
**K. C. Busch**, North Carolina State University

*Social Interdependence of Young  
Adolescents during a Smart-Greenhouse  
Project in a Required Science Class*

**David W. Jackson**, Boston College  
**Pablo Bendiksen Gutierrez**, Boston College  
**Amy R. Semerjian**, Boston College

---

**STRAND 2:**  
**Science Learning: Contexts,  
Characteristics and Interactions**

*Characteristics of the Learning  
Environment*

**8:30 AM – 10:00 AM**

**Mt Hood**

Presider:  
**Jeanna R. Wieselmann**, Southern  
Methodist University

*"Integrating" Investigations into Science  
Teaching: What Are Essential?*

**Lin Zhang**, Providence College  
**Jennifer Van Reet**, Providence College

*Characterizing Epistemic Messages that  
Support the Development of Student  
Intellectual Authority in the Classroom*

**Susan B. Kelly**, University of Illinois  
**Stina Krist**, University of Illinois at  
Urbana, Champaign

### **STRAND 9: Reflective Practice**

#### **Teachers' Beliefs and Identity in their Reflective Practices**

**1:00 PM – 2:30 PM**  
**Salmon**

Presider:

**Lisa M. McDonald**, Teachers College, Columbia University

#### **Exploring Pre-service Teachers' Beliefs about Effective Science Teaching through their Collaborative Oral Reflections**

**Valarie L. Akerson**, Indiana University

**Mina Min**, Appalachian State University

**Fetiye Aydeniz**, Indiana University

#### **Exploring Secondary Science Teachers' Identity Development Through Reflective Practice**

**Preethi Titu**, University of Minnesota

**Gillian H. Roehrig**, University of Minnesota

**Joshua A. Ellis**, Florida International University

#### **Toward more Agentic Reflection: Analyzing Beginning Science Teacher Narratives of Professional Growth**

**Anton Puvirajah**, University of Western Ontario

**Michael Dias**, Kennesaw State University

**Laurie Brantley-Dias**

### **STRAND 10: Curriculum, Evaluation, and Assessment**

#### **Integration of STEM Disciplines**

**1:00 PM – 2:30 PM**  
**Columbia**

Presider:

**Emilie A. Siverling**, Minnesota State University, Mankato

#### **Seventh-Grade Students' Use of Heat Transfer Conceptions During an Engineering Design-Based STEM Integration Curriculum**

**Emilie A. Siverling**, Minnesota State University, Mankato

**Tamara J. Moore**, Purdue University

#### **Does STEM Education Work?: A Data-Driven Rethinking of STEM Education in China's Basic Education**

#### **Toward Integrated STEM Practices: Exploring the Intersections of Science, Engineering, and Mathematical Practice**

**Daniel Pimentel**, Stanford University

**Megan Selbach-Allen**, Stanford University

**Brandon Reynanate**, Stanford university

### ***A Model for Argumentation in Integrated STEM Curriculum***

**Carina M. Rebello**, Purdue University

**Yuri B. Piedrahita Uruena**, Purdue University

**Paul Asunda**, Purdue University

**Hui-Hui Wang**, Purdue University

### **STRAND 10: Curriculum, Evaluation, and Assessment**

***What is the Science Curriculum of Today and the Future?***

**1:00 PM – 2:30 PM  
Medford**

Presider:

**Jan H. Van Driel**, University of Melbourne

***What is the Science Curriculum of Today and the Future?***

**Jan H. Van Driel**, University of Melbourne

**Victoria Millar**, University of Melbourne

**Michael J. Reiss**, University of London

**Dana L. Zeidler**, University of South Florida

**Sami Kahn**, Princeton University

**Richard A. Duschl**, Southern Methodist University

**Jonathan Francis Osborne**, Stanford Graduate School of Education

**Knut Neumann**, Leibniz Institute for Science Education (IPN) Kiel

**Troy Sadler**, University of North Carolina at Chapel Hill

**Justin Dillon**, University of Exeter

### **STRAND 11: Cultural, Social, and Gender Issues**

***Embracing Indigenous Knowledge of the African Diaspora and Tribal Communities***

**1:00 PM – 2:30 PM  
Salon H**

Presider:

**Michael A. Arove**, Lagos State University

***Culture, Context and Scientific Explanations by Biology Students: An African Case Study***

**Peter A. Okebukola**, Africa Centre of Excellence in Innovative and Transformative STEM Education Lagos State University, Lagos, Nigeria

**Tunde Owolabi**, Africa Centre of Excellence in Innovative and Transformative STEM Education Lagos State University, Lagos, Nigeria
